Artificial Intelligence

Project management:

Univ. Ass. MMag. Hanna Rumpold, Bakk. BA (conference organisation)

Univ.-Ass. Mag. Gloria Burda (conference book / organisational support)

Project team:

Scientific staff:

Univ.-Ass. Mag. Nicole Grabmann

Univ.-Prof. Dr. Christian Grafl

Univ.-Ass. Mag. Isabel Haider, LL.M

Univ.-Ass. Mag. Johannes Kramml

Univ.-Prof. Dr. Susanne Reindl-Krauskopf

Univ.-Ass. Mag. Lisa Rösler

Assoz. Prof. Mag. Dr. Farsam Salimi

Univ.-Ass. Mag. Leo Seidl

Administrative support:

Judith Palla

Ivana Stojancic

Project description:

On 11 November 2019 the 8th ALES annual conference on „Artificial Intelligence – Curse or Blessing" took place. During the meeting, interdisciplinary questions, which result from the progress on the field of artificial intelligence and have an impact on the law, were discussed. The opening speech explained intelligent systems from the engineering sciences' angle. The following presentation approached the topic from the German perspective featuring constitutional, civil, penal and data protection law aspects as was well as legal philosophical components. Subsequently, questions regarding civil-law-liability for the development of artificial intelligence were explored. The closing speech of the conference analysed artificial intelligence from the perspective of data protection law.

Project completion:

11. November 2020

Publication:

A short summary of the conference is available here:

https://ales.univie.ac.at/veranstaltungen/

The records of the presentations and all contributions to the discussions were published in conference proceedings in May 2020 in: Grafl/Reindl-Krauskopf, Künstliche Intelligenz – Fluch oder Segen (Verlag Österreich, Vienna).
